# Our projects

In cooperation with its partners artists, architects and designers, EURAN proposes its creative services worldwide for projects related to the interior design of cruise ships, super yachts, hotels, aircraft, office buildings, hospitals and private homes.

In the shipping industry, we worked with a project for a cruise-ferry of Minoan Lines where we commissioned original artworks, paintings, to different artists.

We worked with 12 projects for new built vessels of the cruise company MSC Cruises, where we produced almost 34.000 framed reproductions of artworks, to decorate the cruises ships' passenger cabins. We commissioned artworks for the Childrens' room in MSC Lirica, and provided framed posters for the offices and crew areas of all the vessels. Recently we decorated with art the new cabins of 4 refitted vessels of MSC Cruises and, for the two of them, we replaced all the public areas' artworks with our art reproductions.

We present in this document photos from the above projects: you can see the vessels and some of the art produced for each of them.

We also made recently an extended proposal for a super yacht project.

In the new series of vessels of MSC Cruises, we worked for the passenger cabins and corridors. In particular for the MSC Meraviglia, we included in our project the covered swimming pool, the stairs and the elevators' lobbies.

Our current project is the MSC Seaview.

Thank you.

Alexandre Mimoglou  
Architect

Minoan Lines, Ariadne Palace, 2002, Art in public spaces.

MSC Lirica, 2003, Art reproductions in 780 passenger cabins, in the children room, the on board offices and crew areas.
